

**Log on the proceedings of project wallpaper 18****180912 #We#####**

This evening trained skills again.

Following cycle has developed:

Datei > öffnen.. select from scresh... new Bild

Effekte > Bildgröße... Pixel 100 > x-massst...1% > [Anwenden]

Several go arounds with x-massstthen

Bearbeiten > kopieren in winmask

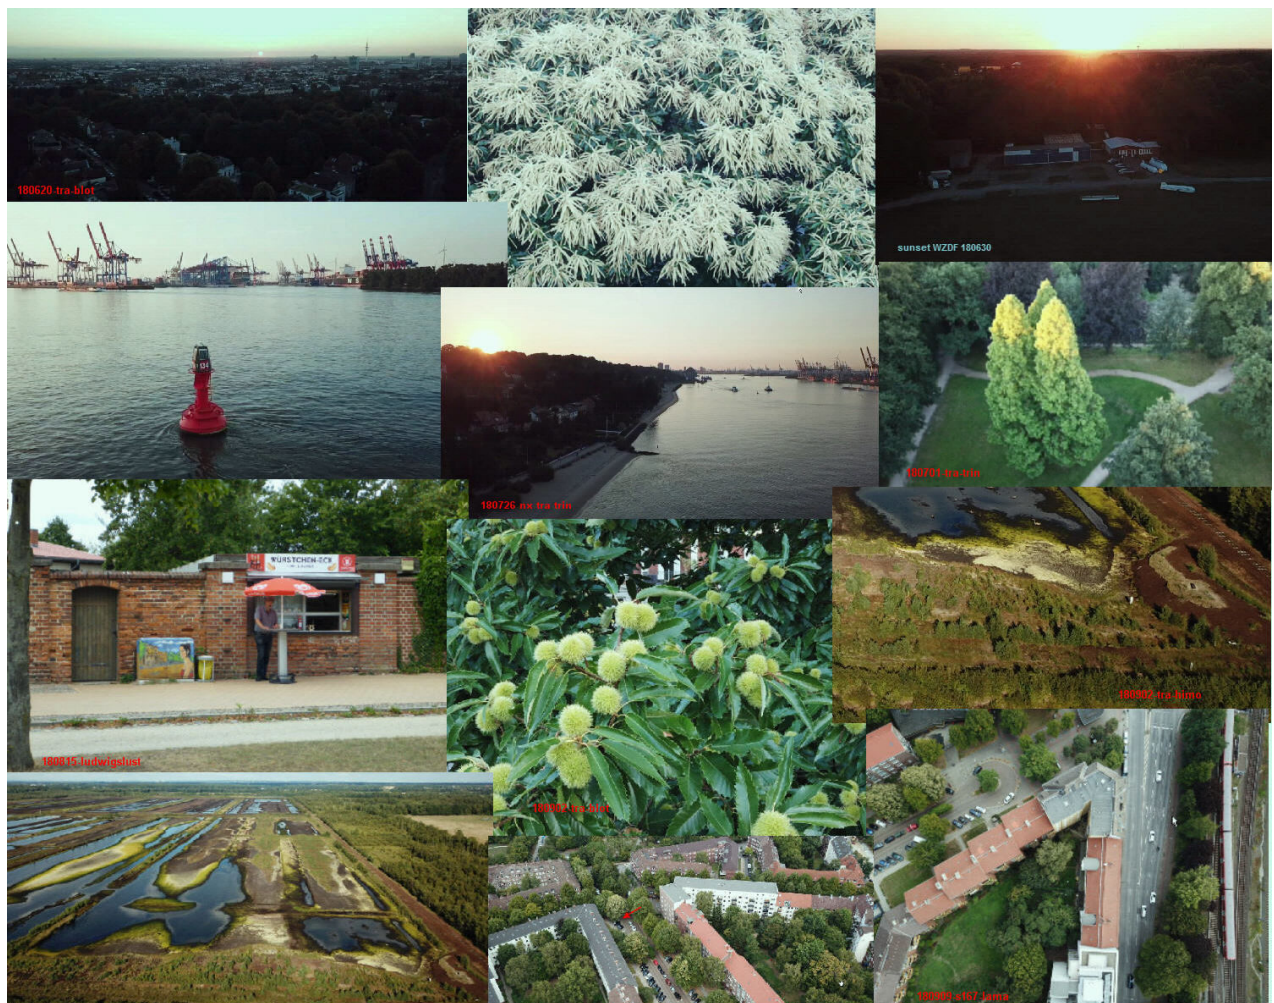

Bild1 anklicken dann..

Bearbeiten > einfügen aus... winmask

Positionieren und Größe einstellen

Ergebnis als jpg speichern

Beschriftung mit Snagit?

Today 10 scresh, 1st-180620 some earlier of wzdf missing. >> looking around for more.

180911 #Tu#####

The project was initiated 180907 in order to collect some scresh to be integrated to a wallpaper for AO screen.

It shall reflect my photo- and mammo-activities.

The tool to be used to compile a single picture is with high probability 'picture publisher', which is assumed to be used compiling the flight collection put together ~2004.

(admin\systems\computer\wallpaper\airbus\fd-bgrda.jpg)

Some corner data collected in advance are AO-screensize 38x30cm, Pixel 1280x1024

Trouble with the wallpaper might be the exact relation pixel to size as encountered with the wallpaper of eee (201? Remembering that there was some fumbling around to integrate A400M on W7-basic)
